Beatriz Mendoza

Lead Software Architect & Engineering Manager

beatriz.mendoza@example.com | +1 (555) 312-7890 | New York, NY

PROFESSIONAL SUMMARY

Staff Software Architect with 11+ years leading distributed engineering teams and delivering enterprise SaaS platforms. Expert in TypeScript, Next.js enterprise architecture, micro-frontends, multi-tenant PostgreSQL systems, and containerized cloud operations on AWS. Passionate about engineering excellence and business outcomes.

TECHNICAL SKILLS & COMPETENCIES

- Enterprise Architecture, Next.js App Router, React, TypeScript
- Distributed Systems, Node.js, Go microservices, Event-driven architecture
- PostgreSQL sharding, Prisma ORM, Connection pooling, Redis
- Docker, Multi-cluster Kubernetes, AWS, Terraform, GitOps
- Engineering Leadership, Agile Coaching, Tech Strategy, System Design

WORK EXPERIENCE

Head of Web Engineering - FinNova Technologies 2020 - Present

– Led a department of 14 full-stack and platform engineers delivering core banking customer portals.

– Spearheaded transition to modern TypeScript micro-frontends and Next.js, achieving 99.99% service availability.

– Collaborated with VP of Product to define engineering roadmaps and reduced customer bug escalations by 52%.

Principal Full-Stack Engineer - Solaria Cloud Systems 2016 - 2020

– Architected global real-time notification engine with Node.js and WebSockets processing 10M events/day.

– Designed relational data structures on PostgreSQL handling $45M monthly transactional flow.

EDUCATION

M.S. in Computer Science - Columbia University (2015)
