David Chen

Principal Backend Architect

david.chen@example.com | +1 (555) 345-6789 | Austin, TX

PROFESSIONAL SUMMARY

Principal Backend Engineer with 10+ years specializing in distributed systems, high-volume database architecture, and microservices in Go and Node.js. Extensive experience with PostgreSQL indexing, sharding, distributed transactions, and Dockerized deployments.

TECHNICAL SKILLS & COMPETENCIES

- Go (Golang), Node.js, Python, Java
- PostgreSQL (Query Optimization, Sharding, B-Tree Indexing)
- Redis Caching, Apache Kafka, RabbitMQ, Event Sourcing
- Microservices Architecture, gRPC, REST, GraphQL
- Docker, Kubernetes, AWS Aurora, Distributed Transactions

WORK EXPERIENCE

Principal Backend Architect - DataStream Global 2019 - Present

– Architected distributed ingestion engine in Go processing over 50,000 requests/second with sub-10ms latency.

– Optimized enterprise PostgreSQL databases containing 400M+ rows, slashing query execution times from 4.2s to 65ms.

– Defined company-wide database guidelines, migration safety patterns, and connection pooling policies.

Senior Backend Engineer - Helios Logistics 2015 - 2019

– Built high-availability inventory sync APIs with Node.js, PostgreSQL, and Docker container clusters.

EDUCATION

B.S. in Computer Science - University of Texas at Austin (2014)
